

List of Preventative Measures

We hope our heightened hygiene and preventative measures will provide a safe environment for our students and staff, and we greatly appreciate your support and co-operation as well.

Please kindly take note of the following:

- During this crucial period, there will be no waiting in our lobby. Our classrooms and entrance areas will be sanitized regularly. Please only arrive 5 minutes before the session to drop off and pick up your child.
- Parents need to confirm guardian and child's travel history during this time by completing the [Health & Travel declaration form](#). For all students that have travelled to China, they will be asked not to come to class until 14 days after arrival date.
- All students, guardians and staff are required to bring and wear their own face masks on premise at all times. We suggest students to place 2 extra masks in their school bags. We would love to provide masks for each person, however due to the limited supply, we may not be able to arrange one.
- Temperatures will be taken upon their arrival before entry to our premise. Anyone with temperatures above 37.5 °C or not wearing face masks will not be allowed to enter the premise. We ask guardians to accompany students until after temperature has been taken in case a student is running a temperature.
- During this time, we have been informed by Hysan Management that they will also check that anyone that enters the building must be wearing a mask and that their temperature is below 37.5 °C.
- If any student is feeling unwell, with any fever, flu/cold-like symptoms, they must be kept at home.
- We have set up multiple air-purifiers and alcohol-based hand sanitizers throughout the centre.
- Shoes will be disinfected upon arrival to limit the travel of germs.
- Students must wash their hands with soap prior to attending class.

We greatly appreciate your help to ensure a safe and healthy environment for everyone.
